## Free DOC Reader

KEYMACRO is a program designed to allow you to connect several programs and gadgets via USB keys without installing them on your PC. This utility will come in handy if you work in a large organisation, for instance, where you may want to use a group of machines for your daily tasks, without needing to install everything. Setup notice Install KEYMACRO if you wish to connect USB keys to your computer, but note that it will require a third-party USB driver to enable you to perform this procedure. Otherwise, you will be able to download the application from their official site, with the details available on the page. After downloading and installing the KEYMACRO program, you can access the website with the USB keys connected to your system and find instructions that will help you get started. You can also choose to view the USB keys and their content in your computer's 'My Computer', so you can access them in the future. Keyboard macros The main function of KEYMACRO is to let you create keyboard macros. A keyboard macro is a set of operations that will be performed every time you press a particular key. This is a convenient way of customising the way your PC operates, which is especially useful if you want to develop a quicker system, for instance. You can create keyboard macros for any of the software you have installed on your PC, enabling you to assign them any combination of keyboard keys, such as Alt, Ctrl, Win and Fn. Keyboard macros can also be used to connect gadgets with your computer, such as a USB flash drive, a printer or a webcam, to name a few. You can write your own macro to make it easier to connect your machine to certain USB keys. This program does not require any set-up, so you will be able to start using it immediately once you install it on your computer. Keyboard macros is not that common among users; however, if you
