Rooms range from vibrant and chic to cosy and classical. And in between, there are also a few mysteries awaiting the discovery. You don't have to unravel the mysteries of the hotel yourself. With our MagicBud feature, you can just relax and enjoy the room. MagicBud automatically sets up the magic theme for you and your room - the perfect background soundscape for any occasion. All you have to do is put your bud in your room and press MagicBud. With MagicBud you can, for example, play your favourite music and listen to the ringing sound of a speed dial on your mobile phone. But it goes much beyond that. You can use MagicBud to play your own soundbites, record and store your own MagicBud content at a later date and you can even create your own MagicBud content with our MagicBud Studio software. MagicBud, for example, uses an automatic voice recognition. If you say 'Hello' to MagicBud, it will use your voice to define MagicBud content for you. You can use this to, for example, create a MagicBud content that simply greets you by name each time you wake up. You can save such 'waking-up content' in the MagicBud database and use it to greet you when you get up in the morning. With the MagicBud Audio Engine, MagicBud also processes sounds and music in the room. These sounds include the room's environment, air-conditioning and heating, but also such items as the opening and closing of the curtains, the room's door and others. The MagicBud feature simply detects background sounds and processes them to create a 3D sound 0cc13bf012
