Close Autocad and open Thelminder Gold. Import the files into your Autodesk 3D Studio Max and enable the VR viewport and triangulation. Load the new model into your model and save it as a.3dm file. Export the.3dm to a.obj file. Open the.obj file with the FreeViewer and Save as a DXF file (which will create a perspective view file). Load the new perspective DXF into your Autodesk 2D designer and Save as an AutoCAD file. Close the.2d file and open the.acad file in Autodesk AutoCAD Reload the.acad file with your Autodesk Inventor. Open the model in Inventor and save it as a.ifc file. Load the new.ifc file into Thelminder Classic Conclusion Using OGG or V4L software, calibrate the VR view port and capture a point cloud of the model. The captured point cloud will have the same points as your.3dm file. Save this as a.ply file. Using Blender, use an automatic point cloud filter to process the.ply file to a.pts file. Save the.pts file as a.vtp file. From Thelminder Classic, export the.pts file to a.3dm file and export it as a.stl file. Load the.stl file in your Virtual Reality module and enable the VR view port and triangulation. Then use the.stl file in your 3D design software. - 0 . 0 3 2 2 4 0 4 3 r o u n d e d t o f i v e d p s ? - 0 . 0 3 2 2 4 W h a t i s 2 . 6 7 0 1 6 r o u n d e d t o o n e e
