A: you can decode the below binary using online tool like decoder32.com. jre-6u24-windows-i586-p06 then you need to compare the hash value with the hash value of your hashpackaged AutoNest.v9.x.x.Crack.rar which you got from the online service. It should be match the hash of your hash packagen so that you can decypted and crack it. There is not any e-mail send by  
me to you because you can not edit your question in future, so please always share your questions when you got them. A: A bit old, but I had the same problem today and had to figure it out. It ended up being as easy as renaming the file to "AutoNest.v9.x.x.Crack.rar". Apparently there is a VirtualBox bug with some signature verification where it will crash when it can't  
verify the signature. The only reason it wouldn't crash on my computer was because I renamed the file. Shubhada Sanyal Shubhada Sanyal is an Indian Actress.
